

Wristwatch Bracelet resizer

Print this page to estimate your wrist circumference for correct bracelet sizing.

Instructions:

- 1) Print this page. When the Print dialog box appears, ensure that Page Scaling is set to **None**.
- 2) Compare the BRACELET SIZER with a ruler to ensure that the SIZER printed at the correct scale, e.g. place a ruler at the 3 inch mark and measure one inch to ensure that the 4 inch mark is accurate.
- 3) If step (3) was successful, cut out the entire Bracelet sizer around its borders.
- 4) Punch a hole through both X's at the top of the sizer.
- 5) Cut along the dotted line between the holes.
- 6) Place the sizer around the wrist to be measured. Pull the rounded end through the slit.
- 7) Ensure that there is enough room left around the wrist to allow for an index finger (of the opposite hand) to fit through.
- 8) Read off the measurement in inches or millimeters as it appears through the slit.
- 9) If you wish Gemnation to resize your watch bracelet to the measurement in step (8), please enter this measurement at checkout.

Additional terms and conditions may apply. Please see Gemnation.com for any additional information.

Gemnation is not responsible for erroneous printing or measuring.

Use this sizer at your own risk.
